

## STABLE MIX 20kg

A blended selection of the finest Irish grains and oils fortified with Pegus equine premix. Designed for horses and ponies of all breeds, ages and work type as a balanced sweet feed for maintenance and low level exercise.

## STABLE CUBE 20kg

Every day high fibre cube for all types of horses and ponies in light work and rest. Fully fortified with the Pegus Equine premix supplement assures that your horse has all the vitamins and mineral for overall health and well-being.

## COOL MIX (SWEET) 20kg

This classic sweet feed has an oat-free formula uses the finest blended and 'toasted' grains to ensure maximum digestibility for your horse allowing for a safer digestion of starch in the gut system. This highly palatable feed is fully balanced with the Pegus Equine pre-mix supplement. Protein is added for excellent muscle tone and tissue strength during exercise, and soya oil is added for slow release energy, better stamina and shiny glossy coats.

## PDS COOL CUBE 20kg

Perfect all round feed, high fibre, low energy feed. Contains lower starch levels than a mix with double cooked grains for better digestibility and healthy gut function. Fully balanced with the Pegus Equine pre-mix supplement and protein for excellent muscle tone and tissue strength during exercise, PDS Cool Cube provides a lower starch alternative for excitable horses and ponies in competition.

## HORSE HEALTH CUBE 20kg

Low Starch Formula  
High Performance  
Bone Development

Low GI  
Healthy Digestion  
Muscle Development

Developed for Horses and Ponies prone to Tying Up, Colic, Hindgut acidosis and associated digestive problems, Cushings, Ulcers, Nutritionally related developmental orthopaedic disease

## HUNTER & PONY COMPLETE 20kg

Foundation feed of Pegus and still the choice of many riders, this is a high fibre, medium energy feed. Contains lower starch levels with double cooked grains for better digestibility and healthy gut function. Fully balanced with the Pegus Equine pre-mix supplement and protein for excellent muscle tone and tissue strength during exercise, Hunter & Pony Complete provides a lower starch alternative for excitable horses and ponies in competition.

## HIGH PERFORMANCE MIX 20kg

Highly palatable blended sweet feed mix designed to meet the demands of horses in hard work or requiring a faster release speed of energy. Using only the best tested Irish oats and toasted cereals, this feed provides readily available energy to meet the needs of the horse's anaerobic respiration during periods of fast and demanding work, as well as providing the organs and tissues with essential vitamins and minerals for improved function.

Also includes Pegus Equine pre-mix supplement and proteins for excellent muscle tone and tissue strength during exercise, higher levels of antioxidants which are essential to aid recovery and reduce tissue damage. Pegus blended oil aids stamina and reduces lactic acid production, a major factor in limiting performance.

## HIGH PERFORMANCE CONCENTRATE 20kg

These high energy cubes offer a lower starch alternative to Hi Performance mix. Contains lower starch levels than a mix offering double cooked grains for better digestibility and healthy gut function. High Performance Concentrate is fully balanced with the Pegus Equine pre-mix supplement and protein for excellent muscle tone and tissue strength during exercise, with higher levels of antioxidants which are also essential to aid recovery and reduce tissue damage. Can also be used as a follow on feed plan with yearlings after Pegus Junior as sales prep.

## TRIPLE E STUD CUBES 20kg

This highly digestible, energy, vitamin and mineral-dense cube uses only the best Irish grains and cooked cereals to provide readily available energy to meet the needs of the broodmare during periods of gestation and lactation.

Triple E is laced with essential minerals from Pegus Equine breeder pre-mix for the very important final 3-4 months of pregnancy where the foal lays down the building blocks for strong tissue and skeletal foundation for future strength. The energy dense cubes and bio-available mineral ensures high quality milk yields in lactation when the foal requires the mother's calorie and mineral-rich milk. Triple E benefits stallions during the covering season with essential energy levels and higher Vitamin E levels improving fertility and libido.

## PEGUS JUNIOR 20kg

Pegus Junior is a high protein feed for foals and young-stock. Designed and formulated to promote strong skeletal growth and outstanding muscle tone in the foal. Contains lower starch levels to help reduce incidences of OCD and growth issues related to higher grain diets such as mixes, Pegus Junior offers double cooked grains for better digestibility and healthy gut function in the young stock and a steady growth curve for developing foals and weanlings.

## PREMIUM RACEHORSE CUBE 20kg

Designed for the higher demands on the equine athlete. This highly digestible and energy dense cube uses only the best tested Irish oats and toasted cereals to provide readily available energy to meet the needs of the horse's anaerobic respiration during periods of fast and demanding work. It also provides the organs and tissues with essential vitamins and minerals for improved function with Pegus Equine pre-mix supplement and proteins for excellent muscle tone and tissue strength during exercise. The higher levels of antioxidants are also essential to aid recovery and reduce tissue damage. Premium Racehorse Cube also contains Super Fibre technology; this increased fibre availability offers almost equal energy as typical grain diets, yet adding by reducing starch dependency and reducing muscle fatigue and chances of hind gut acidosis.

## PRODUCT ANALYSIS

Feed	Protein	Oil	Fibre	Feeding Rate*
<b>STABLE MIX</b> Suitable for all types of horse and ponies in light work	12	3	9	2-4 kg per day
<b>STABLE CUBE</b> Suitable for horse and ponies and those with an excitable nature.	12	3.4	17.9	2-4 kg per day
<b>HORSE HEALTH CUBE</b> Developed for horses and ponies prone to Tying up, Colic, Hindgut acidosis and associated digestive problems, Cushings, Ulcers, Nutritionally related developmental orthopaedic disease	13	10	17	2-4 kg per day

## GOOD FEED GUIDE

The key principles of getting the best from your feed plan is to evaluate, who are you feeding and why. Selecting an appropriate feed for your horse is not difficult if we ask ourselves some simple questions.

- What is the age of the horse?  
Young, growing horses have different nutrient requirements compared to mature horses.
- What is the function of your horse?  
Is the horse pregnant, nursing a foal, a performance horse or at maintenance?
- An appropriate feed can be identified if we consider the feeding of horses in different phases.
  1. Age of horse
  2. Function of horse
  3. Body condition
  4. Energy release type - slow or fast
- Every horse is an individual and what works for one may not work for the next.
- Feed to meet the nutritional demands of the sport  
e.g. Endurance and Polo have totally different needs in feeding.
- Maintain horses in moderate body condition, always check your horse's weight and growth.
- Control weight gain by exercise/conditioning and the amount and type of feed fed.
- Make sure all basic, essential nutrient requirements are met.
- Never over mix complete feeds with large amounts of grain, as they are balanced and adding extra grain only dilutes the essential vitamins and minerals.
