

### HOW TO USE IT

#### FAST PREPARATION:

- 1) Pour the carefully measured quantity of powder into water heated to 45°C.
- 2) Whisk briskly to obtain a homogeneous mixture.
- 3) The preparation should be at least 40°C.

Use drinking water and clean tools. Close the bag after use and keep in a fresh and dry place. This milk replacer is also well adapted for feeding machines.

#### ADVICE FOR THE FIRST DAYS

- Provide clean drinking water.
- Supply quality straw or hay.
- Distribute Calf 20 or Calf 18 from the 2nd week and renew daily.

All **bought in** calves should be administered 3 courses of *Elvor Digest* before moving across to milk replacer.

Elvor Digest contains lactose, sugars, mineral salts, clays and betaine, all agents that help maintain a healthy intestine, rumen, and liver function in periods of stress or difficult times

### FEEDING CHART FOR BUCKET

2 Meals Per Day			
Week (After Colostrum)	Water (L per Meal)	Milk Replacer (g per Meal)	Total Meal (L per Meal)
1 (ADAPTO)	2.2	300	2.5
2 (ELVOR)	2.2	300	2.5
3 (ELVOR)	2.65	375	3
4 (ELVOR)	2.65	375	3
5 (ELVOR)	2.65	375	3
6 (ELVOR)	2.65	375	3
7 (ELVOR)	2.2	300	2.5
8 (ELVOR)	1.75	250	2
9 (ELVOR)	0.875	125	1

### FEEDING CHART FOR AUTOMATED FEEDERS

	Period (After Colostrum)	Duration (Days)	Meal (L per Day)	Concentration (g/L)
Bucket ADAPTO	Day 1 - 4	-	2x2L	125 g/L
	Day 5 - 7	-	2x2.5L	125 g/L
Auto Feeder ELVOR	Period 1	14 days	5 to 7L	125 g/L
	Period 2	14 days	7L	125 g/L
	Period 3	35 days	7 to 2.5L	125 g/L
	Period 4	3 days	2.5 L to 0	125 g/L

Contact our calf feeder expert to calibrate machine if required.

The Elvor range can be used for once a day feeding. However, for calf welfare and to stimulate better growth **Elvor recommend Two meals a day from day one.** For more information on the Elvor Range and Calf 18 can be found on <https://www.lifeymills.ie/animal-feeds/elvor-calf-18/>
